Education

RCC IIT

2026 – Expected 2030

Bachelor of Technology in Computer Science and Engineering

Kolkata, West Bengal

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Architecture, Software Engineering, Web Development

Experience

Software Development & AI

2026 – Present

Freelance Software Developer

Kolkata, West Bengal

- Developed responsive websites and software solutions for clients, translating business requirements into functional digital products.
- Worked across frontend development, APIs, databases, third-party integrations, deployment, and cloud services to deliver complete web solutions.
- Built AI-powered applications using LLMs, Generative AI, RAG, AI agents, automation, and API-based workflows.

Projects

Sahara | *React.js, Node.js, Express, MongoDB*

- Developed a full-stack web application with secure user authentication and dynamic content management.
- Implemented a responsive user interface and optimized API endpoints for efficient data retrieval.

JanSetu AI | *Python, LLMs, React.js, FastAPI*

- Built an AI-driven platform leveraging Natural Language Processing to bridge communication gaps and automate query resolutions.
- Integrated Large Language Models (LLMs) to provide intelligent responses, enhancing user experience and operational efficiency.

macOS Portfolio AI | *React.js, Tailwind CSS, Vercel*

- Designed and deployed an interactive, web-based portfolio mirroring the macOS desktop environment.
- Implemented dynamic components including draggable windows, a functional dock, and interactive widgets for a unique user experience.

CareerForge AI | *Next.js, OpenAI API, Vector Matching*

- Developed an AI platform that parses resumes, maps skills to industry benchmarks, and identifies ATS gaps in real time.
- Integrated an AI engine to reconstruct professional narratives using the Google XYZ formula and match candidates with active job listings.

Personal AI Journal | *React.js, AI Integration, Firebase*

- Created an intelligent journaling application that utilizes AI to analyze daily entries, track moods, and provide personalized insights.
- Implemented secure user data storage and a seamless interface for logging and reviewing personal thoughts.

Certifications & Training

ISRO (IIRS): AI/ML for Geodata Analytics, Bharatiya Antariksh Hackathon 2026, Climate Change Disasters

Google & Google Cloud: Gen AI Academy APAC 2026 (Cohort 3), Build with AI Bootcamp

Scaler: Fundamentals of Docker & Kubernetes, Designing Scalable RAG Pipelines, Python

Job Simulations (Forge): Mastercard (Cybersecurity), Deloitte (Data Analytics), Electronic Arts (Product Mgmt)

Simplilearn: Data Analyst 101, Digital Transformation with Google Cloud

Oracle: Databases for Developers: Foundations

Technical Skills

Languages: Python, JavaScript, TypeScript, HTML, CSS

Technologies/Frameworks: React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, MongoDB, Firebase

Tools & Concepts: Large Language Models (LLMs), Generative AI, RAG, Natural Language Processing (NLP), REST APIs, Git, GitHub, Vercel
